

With the Amazon spa you will not have to go anywhere; you can enjoy a swimming session followed by a relaxing jacuzzi in the comfort of your own home.

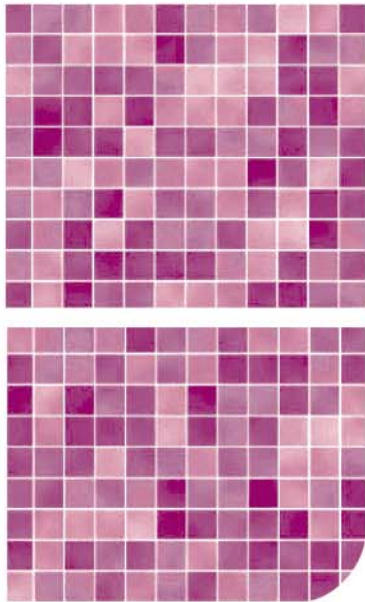

The bathing area is accessible from both sides, meaning it can be easily installed in your home.

It is equipped with a filter system made up of two floating pre-filters, which will enable you to set the level of the water. In addition, a water current from 5 turbo jets will allow you to swim counter-current and keep fit in your own spa.

The hydrotherapy area is made up of a lounger and two ergonomic seats carefully designed for maximum comfort.

With dimensions of 5 x 2.3 metres, the spa's generous measurements and special design make it possible to swim comfortably, so that it is not only a place for leisure and relaxation, but also for sport.
